

Spindle Moulder for Woodworking

This heavy-duty woodworking machine is designed for shaping, routing, and profiling operations on wood. It features a robust construction with a large worktable, adjustable fences, and a spindle assembly for precise material processing.

Product Overview

Professional Woodworking Moulder

This heavy-duty spindle moulder is engineered for precise shaping, routing, and profiling of wood components in industrial settings. Its robust construction ensures stability during intensive material processing, while the large worktable and adjustable fences provide versatility for complex woodworking tasks. Designed with operator safety in mind, it includes integrated emergency stop mechanisms and protective guarding for a secure production environment.

Technical Specifications

Safety Compliance

- Emergency stop button
- Protective guards
- Robust construction

Model

M517-108

Application

Shaping, Routing, Profiling, Industrial
