

Spindle Picking Grease for Cotton Pickers

This special spindle picking grease is designed for cotton pickers. It is composed of base oil thickened and refined by composite metal soap with additives for extreme pressure, anti-wear, and corrosion resistance.

Product Overview

High-Performance Spindle Lubrication

This specialized spindle picking grease is engineered specifically for the rigorous demands of cotton picking machinery. Formulated with composite metal soap and a premium additive package, it offers exceptional anti-wear, anti-rust, and anti-corrosion properties. This ensures consistent machine performance and extended service life for critical spindle components even under heavy-duty operational conditions.

Technical Details

Base Composition	Composite metal soap thickened base oil
Additive Properties	Extreme pressure, Anti-wear, Anti-oxidation, Anti-rust, Anti-corrosion

Packaging and Logistics

Net Weight	15 kg
------------	-------

Application

Primary Application	Cotton picker spindles
