

Spiral Duct Forming Machine

This high-speed spiral tube former is designed for manufacturing round ducting. It is capable of producing tubes from various materials, including galvanized steel, stainless steel, and aluminum.

Product Overview

High-Speed Spiral Tubeformer

This high-speed spiral tube forming machine is precision-engineered for the efficient manufacturing of high-quality round ducting. Designed for versatility, it supports a wide range of materials including galvanized steel, stainless steel, and aluminum. With integrated automatic cutting and adjustable forming heads, it provides consistent production outputs suitable for demanding HVAC, industrial, and construction applications.

Technical Specifications

Key Features

- High-speed operation
- Adjustable forming heads for diameter variations
- Automatic cutting system
- Digital control panel for precise operation

Supported Materials

Galvanized Steel, Stainless Steel, Aluminum

Application

Industry Applications

HVAC • Industrial • Construction
