Product Overview

High-Efficiency Sandstone Washing

The XL series spiral sandstone washer is a robust, high-efficiency system designed for desliming, cleaning, and grading in industrial aggregate applications. It utilizes a powerful helical screw mechanism within a water-filled trough to effectively remove impurities like clay and silt from coarse or fine materials. Engineered for reliability in harsh construction and mining environments, this machine helps enhance the quality of sand and stone products through precise agitation and separation.

Certifications

Compliance Standards

ISO 9001 • CE • BUREAU VERITAS • TÜVRheinland

Configuration

Structure Options

- Single Spiral
- Double Spiral

Duty Type by Particle Size

Type	Application Range
Heavy Type	10-80mm coarse particle
Light Type	Fine particle (-10mm)

Applications

Target Industries

Road Construction, Railway Construction, Building Materials, Hydro-power Projects, Mining, Quarrying
