

Split Air Conditioner Protective Cover

This cover protects split air conditioner units from dust and environmental damage. It is designed with ventilation to prevent moisture buildup and maintain air circulation.

Product Overview

Premium Protection for Split Air Conditioners

This durable protective cover is specifically engineered for split-type air conditioner units, commonly utilized in residential and small commercial environments. Designed to shield your equipment from dust, debris, and harsh weather conditions, it helps extend the lifespan of your unit. The thoughtful design incorporates ventilation features to prevent moisture buildup, ensuring optimal air circulation and performance maintenance.

Key Features

Design Highlights

- Integrated ventilation system
- Designed for split-type units
- Durable construction material

Protection Capabilities

Dust Resistant, Debris Protection, Weather Resistant, Moisture Control

Compatibility

Usage Environment

Residential • Small Commercial

Application

Split-type Air Conditioner
