

Split Form Cold Storage Unit

This split form cold storage unit is designed for refrigeration applications. It features multiple fans for efficient cooling and includes pressure gauges for monitoring performance.

Product Overview

Split Form Cold Storage Solution

The TC series split form cold storage equipment is engineered for reliable refrigeration in demanding cold storage environments. Designed for efficiency, these units utilize multiple fan systems to ensure consistent cooling performance. Integrated pressure gauges allow for precise monitoring, making these units suitable for maintaining strict temperature control in professional storage facilities.

Technical Specifications

Available Models

- TC60DF
- TC80GF

Monitoring Features

Pressure Gauges

Equipment Type

Split Form Cold Storage

Cooling System

Multi-fan system, Refrigeration
