

Split-System Air Conditioner for Climate Control

This air conditioner is designed to provide efficient and reliable cooling for residential or commercial spaces. It features a split-system design, comprising an indoor unit for air distribution and an outdoor unit for heat rejection.

Product Overview

Professional Climate Control Solution

This split-system air conditioner is engineered to provide efficient and reliable climate control for both residential and commercial environments. The system features a modern, wall-mounted indoor unit designed for optimal air distribution, paired with a robust, weather-resistant outdoor unit. With versatile operating modes and user-friendly controls, it offers a comprehensive solution for maintaining comfortable indoor temperatures.

System Design

Installation Type	Split-system (Indoor and Outdoor units)
Mounting Style	Wall-mounted indoor unit

Features & Performance

Key Performance Benefits

- Energy-efficient cooling
- Quiet operation
- Adjustable airflow louvers
- Digital display interface
