

Split System Air Conditioner with Remote Control

This split air conditioner features an indoor unit with a digital display and an outdoor unit housing the compressor. It includes a remote control with multiple functions like mode selection, fan speed adjustment, and temperature control.

Product Overview

Professional Cooling Solution

This split system air conditioner offers a modern, sleek indoor design equipped with a digital temperature display for real-time monitoring. The robust outdoor unit ensures reliable compressor operation for efficient performance in various environments. Designed for user convenience, the included remote control provides comprehensive management of climate settings including specialized sleep, eco, and turbo modes.
