Product Overview

Versatile Abrasive Sponge Blocks

These sponge abrasive blocks are engineered for professional sanding and finishing, featuring a flexible sponge backing that provides superior conformability to contoured surfaces. With a durable abrasive coating, they ensure even pressure distribution to prevent uneven sanding or surface damage. They are highly effective for materials including wood, metal, plastic, and painted surfaces, making them a versatile choice for both hand and machine applications.

Technical Specifications

Density Classification

Grade	Density
Grade A	90 KGS
Grade B	65 KGS
Grade C	50 KGS
Grade D	35 KGS

Available Sizes

- 100 x 70 x 25 mm
- 125 x 100 x 10 mm
- 125 x 95 x 12 mm

Abrasive Types

Aluminium Oxide, Silicon Carbide Oxide

Available Grits

40# to 240#
