

Sponge Float for Tile and Masonry

This professional-grade sponge float is designed for masonry and tiling applications. The tool is ideal for grout removal, cleaning excess mortar, and creating a smooth, even finish on tiled surfaces.

Overview

Professional Masonry & Tiling Sponge Float

This professional-grade sponge float is engineered specifically for masonry and tiling applications, providing a reliable solution for grout removal and mortar cleaning. Featuring a high-density, open-cell sponge structure, it offers optimal water absorption and release for a smooth, consistent finish. Built with a sturdy backing plate and an ergonomic handle, this tool is designed for efficiency and comfort during extended use on ceramic, porcelain, and natural stone surfaces.
