Product Overview

Industrial Sponge Recycling Solution

This high-performance system is engineered for the efficient recycling of scraps and the production of regenerated sponge. By integrating this production line, manufacturers can significantly reduce material waste and production costs while maintaining high quality standards. The unit is versatile enough to operate as a standalone system or as auxiliary equipment within a larger sponge production facility.

Technical Specifications

Volume of Blending Tank	10 m ³
Mixing Speed	40 r/min
Max Pressure of Hydro Cylinder	12000 kg
Total Power Consumption	45 kw
Total Machine Weight	4300 kg

Dimensions

Foaming Mould Size	2,050 x 1,550 x 1,000 mm
External Machine Size	6,000 x 4,000 x 5,200 mm
