

Spool Solder Wire

This solder wire provides good wetting and extension, which avoids short connections. It features high efficiency deoxygenization, little splash, light smell, and a bright, flat color after welding.

Product Overview

High-Performance Soldering Solutions

This professional-grade solder wire is engineered using advanced technology to provide consistent, reliable performance for electronic assembly and maintenance. Available in a wide variety of configurations, including active and inactive resinous cores with varying core counts, it caters to diverse technical requirements. Options ranging from low-temperature to high-temperature variants ensure compatibility with specific thermal sensitivities in your production process.

Technical Specifications

Core Configurations

- Single Core
- Three Cores
- Five Cores

Diameter Range	0.5mm - 10.0mm
Flux Content	2.5 %

Product Types

Available Variants	Active Resinous, Inactive Resinous, Water-Cleanout, No-Cleanout, High Temperature, Low Temperature
