

Spool Winding Machine for Wire Gauges

This precision winding machine is designed for winding various materials onto spools or coils. It features adjustable winding speed, tension control, and automatic layer winding.

Product Overview

High-Precision Vertical Winding Solution

The HS-M330 is a professional-grade vertical winding machine engineered for the production of spiral wound gaskets. It supports a wide range of diameters from 200mm to 1600mm, ensuring versatility for various industrial sealing requirements. Equipped with a variable frequency gear motor and dual roller drive, this machine provides stable, controlled winding for high-quality output.

Technical Specifications

Gasket Diameter Range

200 mm

Minimum Diameter

1600 mm

Maximum Diameter

Thickness Options

- 3.2
- 4.5
- 6.4
- 7.2

Drive System

Variable frequency gear motor with dual roller drive

Available Profiles

V-profile, W-profile

Features

Key Control Features

OD Control • Inner Ring Compatible • Variable Frequency Drive
