

Spring Balancer Tool Retractor

This spring balancer is designed to offset the weight of handheld tools using a spring mechanism. The reinforced spring wire ensures durability and prevents deformation during use.

Product Overview

Ergonomic Tool Support

This spring balancer is designed to support heavy handheld tools by neutralizing their weight during industrial tasks. Utilizing high-strength reinforced spring wire that resists deformation, it ensures consistent performance and reliability. By reducing operator fatigue, this tool significantly enhances safety and productivity in large-scale production environments.

Technical Specifications

Cable Range	2.5 m
Construction Features	Reinforced Spring Wire, Deformation Resistant, Heavy-Duty Hooks

Performance Metrics

Available Capacity Range

- 30
- 40
- 50
- 60

Weight Reduction Benefit

100 %

Operator Fatigue Reduction
