Product Overview

Robust Cone Crushing Solution

This Spring Cone Crusher is designed for high-efficiency processing of medium-hard to hard ores and rocks. It features a reliable spring overload protection system that prevents mechanical damage from uncrushable materials. Engineered for consistent performance, it offers high reduction ratios and uniform output size for various mining and aggregate applications.

Technical Specifications

Crushing Stages	Coarse Crushing, Medium Crushing, Fine Crushing
Sealing System	Grease seal to isolate dust and lubricants

Operational Benefits

Core Advantages

- Reliable overload protection via spring system
- Low operating and maintenance costs
- Easy gap adjustment
- Extended equipment lifespan
- Reduced downtime
