Product Overview

Professional Automatic Center Punch

This automatic center punch is a precision hand tool designed to create accurate dimples on workpieces, effectively preventing drill bits and screws from slipping. It features a robust spring-driven mechanism that delivers a consistent strike when pressed against a surface, allowing for one-handed operation. With an adjustable cap to regulate striking force and a durable brass-coated body, this tool provides reliable performance for industrial, workshop, and emergency applications.

Technical Specifications

Materials	HSS Needle, Carbon Steel Shell, Brass Coated
