

Spring Tool Balancer

This spring balancer allows operators to move tools up and down with minimal effort. It features adjustable spring tension to accommodate different tool weights.

Product Overview

Industrial Spring Tool Balancer

These professional-grade spring balancers are designed to suspend heavy tools in manufacturing and assembly environments, effectively reducing operator fatigue and improving overall production volume. Engineered for safety and durability, they allow for effortless vertical movement of tools, keeping workspaces tidy and hazards to a minimum. Built for longevity, these units require almost no maintenance even under demanding industrial conditions.

Technical Specifications

Capacity Range

1 kg

Minimum Capacity

400 kg

Maximum Capacity

Available Strokes

- 1.5 meters
- 3.0 meters

Performance & Benefits

Applications

Assembly Lines • Manufacturing • Tool Suspension

Key Advantages

Reduced Fatigue, Improved Accuracy, Low Maintenance, Increased Productivity, Enhanced Safety
