

# Spring Tool Balancer

This tool balancer utilizes spring rebound to suspend tools, offering ergonomic support. It enhances productivity by reducing operator fatigue during repetitive tasks.

## Product Overview

### Ergonomic Tool Suspension

The Spring Tool Balancer utilizes spring rebound power to suspend tools, effectively neutralizing their weight during operation. This mechanical solution is designed to enhance worker comfort, reduce fatigue, and allow for flexible, precise movement in demanding industrial environments. By keeping tools easily accessible and weightless, it significantly improves overall working efficiency.

## Technical Specifications

### Supported Load Capacities

- 70
- 80
- 100
- 120

### Key Features

Adjustable Tension, High-Strength Spring, Durable Housing, Ergonomic Design

## Applications

### Typical Applications

Assembly Lines • Manufacturing Plants • Construction Sites • Moving Services

### Compatible Equipment

- Power Tools
- Welding Equipment
- Assembly Tools
