

Sprocket Conveyor Roller with Plastic Sleeve

This conveyor roller has a durable steel core encased in a plastic sleeve, ensuring smooth and quiet operation. It is equipped with a robust sprocket for powered conveying systems, providing reliable performance and efficient material handling.

Product Overview

Sprocket Conveyor Roller with Plastic Sleeve

This high-precision conveyor roller is engineered with a durable steel core encased in a protective plastic sleeve, designed to provide smooth and quiet operation in industrial environments. Equipped with a robust sprocket, it is specifically built for powered conveying systems, ensuring reliable performance and efficient material handling. This component is an ideal solution for applications requiring precise and controlled movement of goods.

Technical Specifications

Key Features

- High-precision engineering
- Quiet operation
- Durable construction
- Integrated sprocket for powered systems

Core Material	Steel
Sleeve Material	Plastic
Application Type	Powered Conveying, Material Handling, Industrial Automation
