

Sprocket Rim for Construction Machinery

This high-quality sprocket rim is designed for construction machinery, including loaders, excavators, and bulldozers. It is manufactured with precision to ensure optimal performance and durability.

Product Overview

Heavy-Duty Sprocket Rim

This high-quality sprocket rim is engineered specifically for heavy-duty construction machinery, including loaders, excavators, and bulldozers. Designed to withstand rigorous operational environments, it ensures reliable power transmission and extended service life for your equipment. With a robust yearly production capacity of 30,000 units, this component is built to meet the high-demand requirements of both replacement part markets and new equipment manufacturing.

Technical Specifications

Yearly Production Volume

30000 pcs

Annual Capacity

Performance Features

- Precision manufacturing
- High durability
- Reliable power transmission
- Extended service life

Compatible Machinery

Loader, Excavator, Bulldozer
