

Square Exhaust Fan with Protective Grill

This exhaust fan features a square metal frame and a three-blade propeller design for efficient air circulation. A protective grill ensures safety and prevents debris from entering the fan mechanism.

Product Overview

High-Performance Ventilation Solution

This square exhaust fan is engineered for reliability and efficient air circulation in demanding environments like factories, warehouses, and commercial kitchens. Built with a robust all-metal structure and high-quality steel, it features a specialized motor design with excellent overload capacity and a thermal protector for long-term safety. The unit combines large air volume with low-noise operation, ensuring a stable and professional ventilation solution.

Motor & Electrical

Motor Construction	Cold-rolled silicon sheet, Copper enameled wire, Cast aluminum cover
Thermal Protection	Yes
Temperature Rise	50 K

Design & Build

Safety Features

- Protective grill
- Built-in re-settable thermal protector
- Robust all-metal structure

Frame Material	High-quality punching steel sheet
----------------	-----------------------------------

Applications

Recommended Use

Factories • Kitchens • Offices • Warehouses
