

# Square Flange Ball Bearing Unit

This ball bearing unit features a square flanged housing for mounting on flat surfaces. It provides reliable support for rotating shafts and incorporates a sealed ball bearing for contamination prevention and sustained lubrication.

## Overview

### Square Flange Ball Bearing Unit

The UCF200 series ball bearing unit features a robust square flanged housing, specifically engineered for secure mounting on flat surfaces. This unit provides reliable support for rotating shafts across a wide range of industrial applications. Designed for durability, it incorporates a sealed ball bearing to effectively prevent contamination and maintain consistent lubrication, ensuring a long and efficient service life.

## Design & Construction

Housing Configuration	Square Flange
Series	UCF200
Maintenance Features	Sealed Bearing, Contamination Protection, Pre-lubricated

## Technical Specifications

### Mounting Interface

- Square Flange Housing
- Flat Surface Mounting
