Product Overview

High-Performance Axial Ventilation

The Square Frame Exhaust Fan is engineered for efficient air circulation in demanding environments. Featuring a high-quality double ball bearing motor and a high-strength metal impeller, this unit ensures reliable operation and excellent anti-rust properties. Its robust axial-flow design is specifically crafted to meet the ventilation needs of factories, shopping malls, and residential buildings.

Technical Specifications

Motor Technology	Double ball bearing motor
Impeller Material	High-strength metal
Impeller Design	Bending-shaped axial-flow
Surface Finish	Spray painted, Anti-rust

Applications

Recommended Use Cases

- Factories
- Shopping malls
- Entertainment venues
- Residential buildings
- Kitchens
- Bathrooms
- Workshops

Design Features

Frame Configuration	Square frame
Backdraft Prevention	Yes
