

Square Head Shoulder Bolt

This shoulder bolt features a square head and a cylindrical shoulder. It is used in applications requiring precise alignment or as a pivot point.

Product Overview

Precision Shoulder Bolt

This square head shoulder bolt, often referred to as a stripper bolt, is engineered for high-precision mechanical applications. Featuring a distinct cylindrical shoulder and a partially threaded shank, it serves as an ideal pivot point or alignment fastener. Its robust design ensures reliable performance in demanding industrial assemblies.

Technical Specifications

Head Type	Square Head
Model Identifier	J005
Key Features	Square Head, Cylindrical Shoulder, Partially Threaded

Application

Typical Applications

- Precise mechanical alignment
- Pivot point assembly
- Stripper bolt applications
