

Square In-Ground LED Light Fixture

This square in-ground LED light fixture is designed for outdoor use, providing durable and energy-efficient illumination. The fixture is designed for flush mounting in the ground, making it suitable for pathway lighting, landscape accentuation, or architectural highlighting.

Product Overview

Robust Outdoor Illumination

This square in-ground LED light fixture is engineered for high-performance outdoor illumination, combining energy efficiency with a durable, weather-resistant design. Featuring a robust housing and an impact-resistant lens, it is built to withstand harsh environments while providing consistent lighting. Its flush-mount design makes it an ideal solution for pathway lighting, landscape accentuation, and architectural highlighting.

Design & Construction

Mounting Style	Flush-mount
Housing Material	Corrosion-resistant stainless steel
Lens Features	Clear, impact-resistant

Applications

Recommended Applications	Pathway Lighting, Landscape Accentuation, Architectural Highlighting
