

Square LED Panel Light for Recessed Ceilings

This LED panel light provides uniform and efficient illumination for indoor settings. Its square form factor is designed for recessed ceiling installations and features a prismatic diffuser for minimized glare.

Product Overview

Professional LED Illumination

This square LED panel light is specifically engineered for uniform and efficient illumination in indoor environments. Designed for seamless recessed ceiling installation, it features a high-quality prismatic diffuser that effectively minimizes glare while ensuring even light distribution. Its durable construction and energy-efficient technology make it an ideal lighting solution for offices, retail spaces, and diverse commercial buildings.

Physical Attributes

Form Factor	Square
Installation	Recessed Ceiling

Technical Features

Key Benefits

- Uniform light distribution
- Glare reduction
- Energy-saving technology
- Durable construction

Diffuser	Prismatic
Recommended Applications	Office, Retail, Commercial
