

Square Metal Washer with Concave Central Hole

This is a square metal washer with a central hole. It is used in machinery or construction applications to distribute the load of a fastener.

Product Overview

Square Metal Washer with Concave Central Hole

This square metal washer is engineered for reliable load distribution in demanding machinery and construction environments. Featuring a distinct concave central hole design, it ensures stable fastener seating and improved surface contact. Crafted from durable metal alloy, this component provides essential support and stability for various industrial assembly applications.

Technical Specifications

Shape	Square
Design Feature	Concave central hole
Material	Steel, Metal Alloy
Edge Profile	Rounded edges

Application

Primary Applications

- Machinery assembly
- Construction fastening
- Load distribution
