

Square Mold Blow Molding Machine

This blow molding machine is specifically designed for producing square molds. It features an integrated material handling system, precise control mechanisms, and a modular design for scalability and maintenance.

Product Overview

Advanced Blow Molding Technology

The CPXF series is engineered with advanced technology specifically optimized for square mold production. This versatile machine supports container sizes up to 3L, or 2L for bottles requiring inserted handles. Designed for flexibility, it can operate as a standalone unit for independent container manufacturing or be seamlessly integrated into an existing filling line.

Technical Capabilities

Maximum Bottle Capacity	3 L
Specialized Features	Square Mold Design, Handle Insertion Support, Stand-alone Capable, Filling Line Compatible
Max Capacity with Handles	2 L
Series	CPXF
