

Square Ventilation Exhaust Fan

This square exhaust fan is designed for ventilation and air extraction. It features a duct connection for venting air outside.

Product Overview

Efficient Air Ventilation Solution

This square ventilation exhaust fan is engineered for effective air extraction in residential and light commercial settings, such as bathrooms and kitchens. Its compact, square design features a durable plastic housing and a protective front grille to ensure reliable performance. Equipped with a dedicated duct connection, the unit facilitates seamless venting of stale air to the outside, promoting better indoor air quality.

Physical Characteristics

Shape	Square
Housing Material	Plastic
Installation	Wall or Ceiling Mount
Color	White

Technical Specifications

Typical Applications

- Bathroom
- Kitchen
- Utility Room

Ventilation Type	Exhaust, Air Extraction
