

Squirrel Cage Blower Fan

This squirrel cage blower fan is typically used in HVAC systems, electronics cooling, or other applications requiring directed airflow. The fan features a cylindrical design with numerous angled blades arranged around a central hub.

Product Overview

High-Efficiency Squirrel Cage Blower

This squirrel cage blower fan is engineered for effective airflow management in diverse environments, including HVAC systems and electronics cooling applications. Featuring a cylindrical design with precisely angled blades, it ensures consistent and directed air movement. Constructed from durable, lightweight materials, this fan is built for longevity and corrosion resistance, making it a reliable choice for professional cooling solutions.

Technical Specifications

Fan Type	Squirrel Cage Blower
Material Composition	Durable Plastic, Corrosion Resistant
Mounting Interface	Central hub for motor shaft

Applications

Typical Applications

- HVAC Systems
- Electronics Cooling
- Directed Airflow Systems
