

SS 316L Water Well Wedge Wire Screen

This water well screen is manufactured using Johnson screen technology. It features durable and corrosion-resistant stainless steel 316L construction for long-lasting performance.

Product Overview

High-Efficiency Water Filtration

This water well wedge wire screen is engineered for optimal performance in demanding water filtration applications. Crafted from premium stainless steel 316L, it provides superior corrosion resistance for extended service life in harsh subterranean environments. The precision wedge wire design facilitates high flow rates while effectively minimizing clogging risks, ensuring reliable operation for diverse well projects.

Technical Specifications

Material Grade

Stainless Steel 316L

Key Features

Corrosion Resistant, Wedge Wire Design, High Flow Rate, Anti-Clogging

Performance Metrics

Operational Performance

316 L
