

SS304 Mesh Filter with Rubber and Plastic Housing

This SS304 filter features a mesh filter element encased in a durable rubber and plastic housing. It is designed for filtration purposes across various industrial applications.

Product Overview

High-Performance Mesh Filter

This SS304 mesh filter is engineered with a high-quality rubber and plastic housing for superior filtration and durability. Designed for industrial and automotive applications, it provides reliable performance in demanding environments. The unit features precise dimensions and robust construction to ensure long-term service and effective filtration.
