

SS304L Wire Wrap Screen for Deep Well Drilling

This SS304L wire wrap screen is designed for deep well drilling. It allows water or oil to enter the well freely while keeping sand and gravel out.

Product Overview

High-Performance Wire Wrap Screen

The SS304L Deep Well Drilling Rod Base Wire Wrap Screen is engineered for demanding downhole environments, featuring a continuous slot design for optimal fluid intake. Constructed using fusion-welded wedge-shaped wire over longitudinal support rods, this screen offers exceptional structural integrity and effective sand control. It is an ideal solution for water and oil well applications, designed to maintain consistent flow rates while resisting corrosion and mechanical stress.

Dimensions & Physical Properties

Dimensional Range

Parameter	Range/Detail
Diameter	25mm to 1200mm
Length	Up to 6 meters
Slot Size	0.10mm to 6.00mm

Technical Construction

End Connections

- Plain beveled ends
- Threaded couplings
- Flanged

Materials

SS304L, Stainless Steel, Galvanized Low Carbon Steel

Logistics & Packaging

Packaging Standard

Individual units wrapped in bubble bags, packed in secure wooden cases marked with batch number and manufacture date.
