

ST24-A Electrical Plug

The ST24-A is a standard electrical plug. It is designed for connecting devices to power sources.

Product Overview

Professional Electrical Connectivity

The ST24-A electrical plug is designed to meet the rigorous demands of professional industrial environments. Engineered for durability and reliable connectivity, this component serves as a robust solution for power distribution needs. Its standardized design ensures compatibility within professional electrical infrastructures.

General Information

Model Identifier	ST24-A
Product Type	Electrical Plug
