Product Overview

Engineered for precise fitment and durability, this bushing ensures reduced noise and vibration.

High-Performance Stabilizer Bushing

Engineered for the Audi A4, this stabilizer bushing is crafted from high-quality steel and natural rubber to provide superior durability and performance. It features a one-piece casting design with strong anti-corrosion properties, ensuring longevity even in demanding conditions. Designed for direct, in-situ installation, it offers precise fitment that reduces deviation and simplifies the maintenance process.

Key Features

Performance Benefits

- Resolves jitters and vibrations
- Improves driving comfort
- Enhances vehicle stability
- High-quality material construction
- Direct original-place installation
- Long service life

Technical Specifications

The stabilizer bushing provides a secure connection between the stabilizer bar and the chassis to reduce body roll.

Material	Metal/Rubber
Fitment Type	Direct Replacement
Quality Standards	ISO, IATF 16949:2016

Commercial Terms

Trade Terms EXW • FOB • CIF	
Minimum Order Quantity	300 pcs
Warranty	12 months
Payment Methods	TT, LC, Paypal, Alipay
Delivery Lead Time	45-60 days
