Product Overview

Professional Stage Foam Machine Housing

This specialized protective housing is engineered for large-scale stage foam machines, providing robust protection and optimized airflow for internal mechanical components. Designed for demanding stage environments, the unit ensures stable mounting for motors, wind blades, and fan assemblies, significantly enhancing equipment longevity. Its durable construction and transport-ready design make it an essential accessory for professional event and photographic effects equipment.

Design and Compatibility

Internal Component Support

- Electric Motor
- Wind Blade
- Net Cover
- Fan Assembly

Compatible Equipment

Foam Machine, Snow Machine, Smoke Machine, Stage Effect Equipment

Physical Properties

Mobility Features

Heavy-duty Casters • Secure Latches • Reinforced Edges

Color

Orange
