Product Overview

Industrial Stainless Steel Ball Valve

This high-performance stainless steel ball valve is engineered for durability and reliable flow control in demanding industrial environments. Featuring a robust quarter-turn lever handle, it provides precise operation for water, oil, air, and corrosive liquid applications. Designed to meet international standards including ASTM and DIN, this valve ensures a secure, leak-proof seal for your critical piping systems.

Technical Specifications

Available Thread Connections

- NPT
- BSPT
- BSP
- DIN2999

Material Construction	SS304, SS316
Max Working Pressure	1000 PSI
Operating Temperature	-20°C to 230°C

Compliance and Standards

Certification Standards

ASTM B16.34 • BS5351 • ANSI B16.01 • DIN3202

Operational Details

Compatible Media

- Water
- Oil
- Air
- Corrosive Liquids
