

Stainless Steel Belt Conveyor

This belt conveyor is designed for efficient material handling in various industrial applications. Constructed from stainless steel, it ensures durability and corrosion resistance, making it suitable for demanding environments.

ADDITIONAL IMAGES

Product Overview

Industrial Material Handling Solution

This stainless steel belt conveyor is engineered for efficient material transport across demanding industrial environments, including food, pharmaceutical, and chemical sectors. Built with a robust frame and adjustable support legs, it offers high durability, corrosion resistance, and stability for consistent operation. The system features a modular design, including an infeed hopper and side rails, allowing for seamless integration into existing production lines and reliable handling of bulk materials or powders.

Technical Specifications

Suitable Materials

- Dry powder
- Granulators
- Bulk materials
- Packaged goods

Construction Material	Stainless Steel
Target Industries	Food Processing, Pharmaceutical, Chemical

Design Features

Key Features

Adjustable support legs • Corrosion resistant • Modular design • Includes hopper • Side rails included

Drive System	Motor and gearbox assembly
