

Stainless Steel Bow Shackle

This bow shackle is made from high-strength stainless steel. It is designed for secure and reliable connections in marine, industrial, and rigging applications.

Product Overview

Professional Grade Bow Shackle

These bow shackles are engineered for high-strength rigging and connection tasks in demanding environments. Manufactured from high-quality stainless steel, they provide superior resistance to corrosion and wear. Their robust design makes them an ideal choice for marine, industrial, and heavy-duty load-bearing applications.

Technical Specifications

Available Materials	AISI 304, AISI 316
Configuration	Bow Shackle
