

Stainless Steel Chemical Transfer Centrifugal Pump

This pump is constructed from stainless steel (SUS304, SUS316, SUS316L) for good corrosion resistance when transferring chemical fluids. It is engineered for continuous operation in demanding industrial environments.

Overview

Industrial Chemical Transfer Solution

This stainless steel centrifugal pump is engineered specifically for demanding chemical industry applications, offering superior corrosion resistance and durability. Designed for continuous operation, it ensures reliable fluid transfer across various industrial environments. Its robust construction and precision-engineered components make it an ideal choice for high-performance fluid management needs.

Performance Metrics

Flow Capacity

6.3 m³/h

Min Capacity

400 m³/h

Max Capacity

Head Range

5 m

Min Head

125 m

Max Head

Operational Specifications

Max Working Pressure

1.6 MPa

Construction

Material Compatibility

Liquid-contacting parts are customizable based on specific chemical corrosion requirements.

Suitable Applications

Chemical Industry, Fluid Transfer, Industrial Processing
