

Stainless Steel Chemical Transfer Pump

This pump is constructed from stainless steel for excellent corrosion resistance. It is designed for transferring chemical fluids in a variety of industrial applications.

Product Overview

High-Performance Chemical Transfer

The IHG series vertical chemical pump is a single-stage, single-suction centrifugal pump engineered specifically for handling corrosive liquids. Constructed with high-grade stainless steel, it offers exceptional durability and resistance to chemical attack, ensuring a long service life in demanding industrial environments. Its compact vertical, inline design simplifies installation and maintenance, making it an ideal solution for fluid transfer, boosting, and circulation processes in chemical processing and water treatment facilities.

Technical Specifications

Typical Applications

- Chemical processing
- Water treatment
- Industrial fluid transfer
- Boosting systems
- Circulation processes

Pump Type	Vertical Centrifugal Pump
Design Features	Single-stage, Single-suction, Inline design, Corrosion-resistant
Material Construction	Stainless Steel
Connection Type	Flanged
