

Stainless Steel Circular Flange

This circular metal flange is precision-engineered for secure connections in piping systems. Constructed from 316 stainless steel, it offers corrosion resistance and durability.

Product Overview

Precision-Engineered Circular Flange

This circular metal flange is precision-engineered to ensure secure and leak-proof connections within demanding piping systems. Constructed from high-grade 316 stainless steel, it offers exceptional corrosion resistance and long-term durability in harsh environments. Designed to meet ANSI B16.5 standards, this component is suitable for a wide range of industrial applications, including chemical processing, plumbing, and oil and gas infrastructure.

Technical Specifications

Material Grade

316 Stainless Steel

Standards

ANSI B16.5

Dimensions

Key Dimensions

100 mm

Outer Diameter

50 mm

Inner Diameter

10 mm

Thickness

10 mm

Bolt Hole Diameter

Bolt Configuration

4 evenly spaced bolt holes
