

# Stainless Steel Coil Heating Element

Replacement stainless steel coil heating element designed for electric stoves and ranges. The multi-turn spiral design ensures even heat distribution.

## Product Overview

### Professional Coil Heating Element

This high-performance stainless steel coil heating element is designed for reliable and even heat distribution in electric stoves and ranges. Engineered with a durable Cr20Ni80 resistance wire and a robust SUS309S sheath, it provides longevity and consistent thermal output. The unit is optimized for 208-240V systems and offers adaptable power levels between 1130W and 1500W to meet professional culinary requirements.

## Technical Specifications

Part Number	SHM23022
Voltage	208-240V
Power Range	1130-1500W

## Material Composition

Sheath Material	SUS309S
Resistance Wire Alloy	Cr20Ni80

## Logistics

### Shipping Details

**32 pcs**

Quantity per Carton

Carton Dimensions	415 x 415 x 580 mm
