Product Overview

Professional Submersible Well Pump

This stainless steel submersible pump is engineered for reliable performance in deep well applications, water supply, and irrigation systems. Constructed with a durable, corrosion-resistant stainless steel body, it ensures longevity even in challenging underwater environments. Designed for efficiency, the pump features a screened intake to protect the internal mechanism and is suitable for both residential and industrial use.

Key Features

Compliance Warnings

ATTENZIONE • WARNING

Construction Material

Polished Stainless Steel

Primary Applications

Deep Well Pumping, Irrigation, Water Supply, Residential, Industrial

Technical Design

Installation

- Integrated mounting points
- Top discharge port
- Bottom-mounted motor
- Easy maintenance design

Intake Mechanism

Screened intake for debris protection
