

Stainless Steel Deep Well Submersible Pump

This submersible pump is designed for underwater operation and features a compact structure. Its small size and light weight make installation and maintenance easy, while providing safe operation and energy savings.

ADDITIONAL IMAGES

Overview

High-Performance Submersible Pump

This stainless steel multi-stage centrifugal submersible pump is engineered for efficient water extraction from deep wells and boreholes. Constructed with corrosion-resistant materials, it offers exceptional durability and performance in demanding environments, including high-sand content conditions. Its compact design ensures compatibility with narrow well casings, making it an ideal solution for agricultural, industrial, and domestic water supply systems.

Technical Specifications

Insulation Class

Class B

Operating Speed	2850 rpm
Outlet Size	G1 1/4" to G1 1/2"
Maximum Liquid Temperature	35 °C
Motor Power Range	0.75 kW to 7.5 kW
Power Supply Options	Single-phase (220-240V), Three-phase (380-415V)

Application & Features

Typical Applications

- Water supply systems
- Booster systems
- Garden and farming irrigation
- Lowering underground water levels

Fluid Compatibility	Dilute and clean non-corrosive liquids without solid grains or fibers
---------------------	---

Performance Data

Model Performance Summary

Model	Power (kW)	Length (mm)	Weight (kg)
4SP8-05A	0.75	688	15.5
4SP8-07A	1.1	743	16
4SP8-10A	1.5	874	18.5
4SP8-12A	2.2	967	21
4SP8-14A	2.2	1022	22
