

Stainless Steel Dual Scale Ruler

This stainless steel ruler features both metric and imperial scales. It has etched graduations for accurate measurements and is suitable for various applications.

Product Overview

Professional Dual-Scale Measuring Tool

This high-precision ruler is engineered from durable stainless steel to withstand demanding environments in drafting, engineering, and workshop settings. It features permanently etched graduations that ensure long-lasting visibility and accurate measurements over time. With a dual-scale design providing both metric and imperial units, it offers maximum versatility for a wide range of professional applications.
