Product Overview

Professional Drywall Finishing Tool

This stainless steel flexible joint knife is engineered for precision drywall finishing and surface preparation. The hollow-ground blade offers the ideal flexibility for smoothing compounds and taping seams, while the integrated heavy-duty hammer end allows for efficient setting of popped nails and screws. Designed with a comfortable over-mold soft grip handle, this tool minimizes user fatigue during extended professional use.

Blade Specifications

Blade Material	Stainless Steel
Blade Features	Hollow-ground, Flexible, Rust-resistant

Handle and Ergonomics

Ergonomic Benefits

Reduces fatigue • Comfortable grip

Handle Material	Over-mold soft grip
-----------------	---------------------

Additional Features
