

# Stainless Steel Food Preparation Cutter

This stainless steel food cutter is designed for efficient and consistent food processing. It is ideal for chopping, grinding, and emulsifying a variety of food products in commercial kitchens and food processing facilities.

## Product Overview

### Professional Stainless Steel Food Cutter

This high-performance food preparation cutter is engineered for efficient and consistent processing in commercial kitchens and food manufacturing facilities. Constructed from durable stainless steel, it features a sealed processing bowl with a safety interlock system to ensure operator safety during high-speed tasks. Designed for versatility, this machine excels at chopping, grinding, and emulsifying a wide variety of ingredients with precision and ease.

## Performance Metrics

### Cutting Speed

**1400 r/min**

Minimum Speed

**1600 r/min**

Maximum Speed

## Technical Specifications

### Model Specifications

Model	Power (W)	Capacity (L)	Weight (kg)
AQJ-601	550	3	21
AQJ-603	750	4	26
AQJ-605	1100	6	37
AQJ-608	1500	10	47

Electrical Input: 220V / 50Hz

Construction Material: Stainless Steel
