

Stainless Steel Gate Valve DN 15-400

This stainless steel gate valve is available in DN 15-400. It is designed for reliable shutoff in a variety of industrial applications.

General Overview

Industrial Stainless Steel Gate Valve

This high-quality stainless steel gate valve is engineered for reliable shutoff performance across various industrial applications. Featuring a robust, full-bore design, it minimizes pressure drop while offering excellent corrosion resistance for demanding environments. Equipped with a manual handwheel for precise operation, this valve ensures a secure, leak-proof seal via flanged connections, making it ideal for water, oil, and gas media.

Technical Specifications

Standard

GB Standard

Nominal Diameter (DN)	DN 15-400
Material	Stainless Steel
Connection Type	Flanged
Operation	Manual Handwheel
