

Stainless Steel Glass Fitting for Panel Installation

This stainless steel glass fitting is designed for secure and stylish glass panel installations. It features a robust construction with multiple fixing points for enhanced stability.

Product Overview

Professional Glass Panel Solution

This stainless steel glass fitting is engineered for secure and stylish glass panel installations in architectural and interior design projects. Its robust construction ensures long-term stability and reliability for demanding applications. Designed with versatility in mind, it accommodates various glass thicknesses to provide a seamless, high-quality finish for your installation needs.

Technical Details

Model Number	NFRGH-SA8300C-1
Material	Stainless Steel
Installation Type	Panel Installation

Key Features

Design Highlights

- Robust construction
- Multiple fixing points for stability
- Suitable for various glass thicknesses
- Aesthetically pleasing finish
